Instructions

Errata for ICD-10-AM Tabular List, ICD-10-AM Alphabetic Index, ACHI Tabular List and ACHI Alphabetic Index are produced from a database. This has resulted in the format shown below. Each row represents an item/change to be made and contains the following information necessary to complete the errata item.
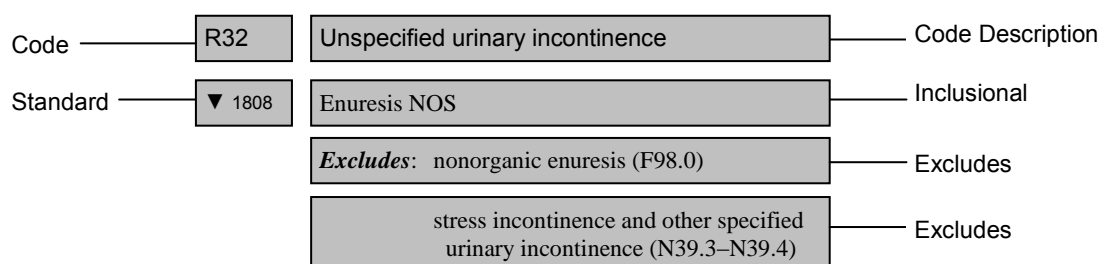

Tabular/Index Entry   The Tabular Entry (Block:code) or Index Entry (Main term:subterm) to which the errata item applies. For example:

|	
ICD-10-AM Tab List:R02	ICD-10-AM Tabular List, Code R02
ACHI Tab List:1886:34533-00	ACHI Tabular List, Block 1886, Code 34533-00
ACHI Index:Revision:device:infusion, implantable spinal	ACHI Alphabetic Index, Revision - device - - infusion, implantable spinal

Note Type   The part of the Tabular or Index Entry to which the errata item applies. To use this errata, it is important to think of a Tabular Entry and an Index Entry as being composed of separate elements as shown in the examples below.

Tabular Entry

Code ——— R32 | Unspecified urinary incontinence ——— Code Description

Standard ——— ▼ 1808 | Enuresis NOS ——— Inclusional

Excludes: nonorganic enuresis (F98.0) ——— Excludes

stress incontinence and other specified urinary incontinence (N39.3–N39.4) ——— Excludes

Index Entry

Term ——— **Dacryocystitis** (acute) (phlegmonous) H04.3
- NEM (non essential modifier)
- Code
- NEM

Term ——— - syphilitic A52.7† H06.0*
- Code
- Code

Term ——— **Endoscopy, endoscopic** — *see also Panendoscopy* — See Also
- NEM

Term ——— - brain (intraventricular) 40903-00 **[1]** — Block
- Code

Term ——— - - with biopsy 40903-01 **[12]** — Block
- Code

Instruction   Type of change to be made. For example:

Tabular/Index Entry	Note Type	Instruction	Existing Value	New Value
ICD-10-AM Index:Complications:umbilical cord	Term	Add		- - velamentous insertion

indicates a term to be added at:
Complications
- umbilical cord
- - velamentous insertion

Tabular/Index Entry	Note Type	Instruction	Existing Value	New Value
ACHI Index:Revision:device:port, implantable vascular access	Term	Delete*	- - port, implantable vascular access	

indicates a term to be deleted at:
Revision
- device
- - ~~port, implantable vascular access~~

*A 'Delete' instruction followed by an asterisk (*) indicates that there are subterms to be deleted as a result of this deletion. In the example given above, subterms and notes to be consequently deleted are:

It should be assumed that if a Tabular 'Code' or an Index 'Term' is deleted, all its accompanying notes ('Code Description', 'Include', 'Exclude', 'NEM', 'Code', 'Block', 'See Also', etc) need to be deleted.

- - - ~~for infusion of agents via catheter~~
- - - - ~~central venous (CVC) 34530-00 [766]~~
- - - - ~~spinal 39126-00 [56]~~
- - - - ~~venous 34530-00 [766]~~

Existing Value   Text of the entry before the errata change.
New Value   Text with errata in track changes.

Code or term to which the change applies

Part of the code/term to which the change applies

Type of change to be made

Text before making the change

Text with errata in track changes

Revise

GUIDE FOR USE

5. For combination codes (see ACS 0015 *Combination codes*) where a diagnosis ~~When a single ICD-10-AM code describes multiple concepts (ie a combination code) and any concept~~ within th~~e~~at code meets the criteria of COF 1, and is not represented by another code with a COF 1 value, then assign COF 1 to the combination code (see Example 2).

Pg 18

Revise

EXAMPLE 11:
Patient admitted with uncontrolled Type 2 diabetes. The patient is known to have nephropathy (CKD stage 3) but no other complications of the diabetes. During admission the patient develops acute kidney failure.

2 – Type 2 diabetes mellitus uncontrolled
1 – Acute kidney failure
2~~1~~ – Type 2 diabetes mellitus with acute kidney failure
2 – Type 2 diabetes mellitus with chronic kidney disease
2 – Chronic kidney disease, stage 3

0102   HIV/AIDS

Pg 42

Revise

EXAMPLE 1:
~~Antiretroviral drug-induced haemolytic anaemia with HIV positive status.~~
A patient is admitted with oral candidiasis due to HIV infection.

Assign and sequence as:

Oral candidiasis	B37.0	*Candidal stomatitis*
HIV disease	B20	*Human immunodeficiency virus [HIV] disease resulting in infectious and parasitic diseases*

Pg 43

Revise

EXAMPLE 2:
A patient with AIDS is admitted with a principal diagnosis of Kaposi sarcoma of skin, and additional diagnoses of wasting syndrome and CMV retinitis.

Assign and sequence as:

Kaposi sarcoma	C46.0	*Kaposi sarcoma of skin* ~~*Drug-induced nonautoimmune haemolytic anaemia*~~
	M9140/3	*Kaposi sarcoma*
HIV disease	B21	*Human immunodeficiency virus [HIV] disease resulting in malignant neoplasms*~~*Antiviral drugs causing adverse effects in therapeutic use*~~
CMV retinitis	H30.9	*Chorioretinal inflammation, unspecified*
	B25.8	*Other cytomegaloviral diseases*
Wasting syndrome	R64	*Cachexia*

0402   CYSTIC FIBROSIS

Pg 79

Revise

Cystic fibrosis (CF) should be coded with the appropriate code from E84.- *Cystic fibrosis* followed by a code(s) for any specified manifestation(s), irrespective of whether the manifestation(s) meets ACS 0002 *Additional diagnoses*. More than one code from E84.- *Cystic fibrosis* should be used if the patient presents with multiple manifestations of CF.

1615   SPECIFIC INTERVENTIONS FOR THE SICK NEONATE

2.   CODE THE FOLLOWING INTERVENTION WHEN PERFORMED:

Parenteral fluid therapy
96199-07 [1920] *Intravenous administration of pharmacological agent, nutritional substance* ~~and~~
96199-08 [1920] *Intravenous administration of pharmacological agent, electrolytes* ~~should be assigned when used for management of carbohydrate, hydration or electrolyte disorders.~~

Examples of diagnoses that may require parenteral fluid therapy are 'neonatal hypoglycaemia' (P70.- *Transitory disorders of carbohydrate metabolism specific to fetus and newborn*) or 'other transient neonatal electrolyte disorders' (P74.- *Other transitory neonatal electrolyte and metabolic disturbances*).

Note: These codes should **not be assigned** when these procedures are **part of resuscitation at birth**.

ICD-10-AM
TABULAR LIST OF DISEASES

Page 1

CHAPTER 1
CERTAIN INFECTIOUS AND PARASITIC DISEASES
(A00–B99)

...

Includes: diseases generally recognised as communicable or transmissible

        Use additional code (Z06 ~~Z07~~) to identify resistance to antimicrobial ~~and antineoplastic~~ drugs

Excludes: carrier or suspected carrier of infectious disease (Z22.-)
        certain localised infections — see body system-related chapters
        infectious and parasitic diseases complicating pregnancy, childbirth and the puerperium [except obstetrical tetanus] (O98.-)
        infectious and parasitic diseases specific to the perinatal period [except tetanus neonatorum, congenital syphilis, perinatal gonococcal infection and perinatal human immunodeficiency virus [HIV] disease] (P35–P39)
        influenza and other acute respiratory infections (J00–J22)

PAGE 32

CHAPTER 2
NEOPLASMS (C00–D48)

…
Note:
…

8. Use of the third edition of International Classification of Diseases for Oncology (ICD-O)

For certain morphological types, Chapter 2 provides a rather restricted topographical classification, or none at all. The topography codes of ICD-O use for all neoplasms essentially the same three- and four- character categories that Chapter 2 uses for malignant neoplasms (C00–C77, C80.-), thus providing increased specificity of site for other neoplasms (malignant secondary (metastatic), benign, in situ and uncertain or unknown).

It is therefore recommended that agencies interested in identifying both the site and morphology of tumours, e.g. cancer registries, cancer hospitals, pathology departments and other agencies specialising in cancer, use ICD-O.

Use additional code (Z07) to identify resistance to antineoplastic drugs

PAGE 66

D72	**Other disorders of white blood cells**

Excludes: abnormal white blood cells (count) (R72)
basophilia (D75.8)
immunity disorders (D80–D89)
neutropenia (D70)
preleukaemia (syndrome) (D46.9)

D72.0   Genetic anomalies of leukocytes
Anomaly (granulation)(granulocyte) or syndrome:
• Alder
• May-Hegglin
• Pelger-Huët ~~Hereditary:~~
Hereditary:
• leukocytic:
  • hypersegmentation
  • hyposegmentation
• leukomelanopathy

Excludes: Chediak(-Steinbrinck)-Higashi syndrome (E70.3)

PAGE 216

K43	**Ventral hernia**

~~Includes: hernia:~~
  ~~• epigastric~~
  ~~• hypogastric~~
  ~~• incisional~~
  ~~• midline~~
  ~~• parastomal~~
  ~~• spigelian~~
  ~~• subxiphoid~~

PAGE 376

CHAPTER 19
INJURY, POISONING AND CERTAIN OTHER CONSEQUENCES OF EXTERNAL CAUSES (S00–T98)

…

Fracture including:
fracture:
• closed:
  • comminuted   }
  • depressed   }
  • elevated   }
  • fissured   }
  • greenstick   }
  • impacted   }   with or without delayed healing
  • linear   }
  • march   }
  • simple   }
  • slipped epiphysis   }
  • spiral   }
  • dislocated   }
  • displaced   }

PAGE 504

✪Z07	**Resistance to antineoplastic drugs**

Note: Assign Z07 as an additional code to identify resistance to antineoplastic drugs in the treatment of conditions classified elsewhere in Chapter 2.

Eighth Edition - Errata 2, 15 December 2013, for implementation 1 January 2014

PAGE 84

634   **Replacement of tricuspid valve**

Code also when performed:
• cardiopulmonary bypass (38600-00, 38603-00 **[642]**)
• operative management of acute infective endocarditis during heart valve procedure (38493-00 **[666]**)

38488-10   Percutaneous replacement of tricuspid valve with bioprosthesis

Includes: ~~cardiac catheterisation~~
          valvuloplasty

Code also when performed:
• coronary angiography (~~38215-00,~~ 38218 **[668]**)

PAGE 84-85

637   **Repair or replacement of pulmonary valve**

38270-03   Percutaneous balloon pulmonary valvuloplasty

Includes: cardiac catheterisation

38488-11   Percutaneous replacement of pulmonary valve with bioprosthesis
          Transcatheter pulmonary valve implantation

Includes: ~~cardiac catheterisation~~
          valvuloplasty

Code also when performed:
• coronary angiography (~~38215-00,~~ 38218 **[668]**)

738   **Venous catheterisation**

∇ 0042
…

13300-00   Catheterisation/cannulation of other vein in neonate
~~∇ 1615~~

Includes: infusion

| 1889 | **Other therapeutic interventions on respiratory system** |

…

92210-00   Nitric oxide therapy
∇ 1615

Code first:
• ventilatory support for neonates (13882 **[569]**, 92209 **[570]**)

AUSTRALIAN CODING STANDARDS FOR ICD-10-AM AND ACHI

PAGE 186

1615   SPECIFIC INTERVENTIONS FOR THE SICK NEONATE

…

2. CODE THE FOLLOWING INTERVENTION WHEN PERFORMED:

…

Catheterisation in a neonate

~~13300-00 [738]   *Catheterisation/cannulation of other vein in neonate*~~
13300-01 [738]   *Scalp vein catheterisation/cannulation in neonate*
13300-02 [738]   *Umbilical vein catheterisation/cannulation in neonate*
13319-00 [738]   *Central vein catheterisation in neonate*
13303-00 [694]   *Umbilical artery catheterisation/cannulation in neonate*

Note: When multiple catheterisations are performed during an episode of care and the same procedure code applies, assign the procedure code once only.
