

ICD-10-AM/ACHI/ACS

Eleventh Edition

EDUCATION PROGRAM 2019

Slide 30; amended to remove reference to O82
Slide 32; resequenced the ACHI codes

 Australian Consortium for Classification Development

Gynaecology, Obstetrics & Neonates

ICD-10-AM/ACHI/ACS Eleventh Edition

2019 Education Program

 Australian Consortium for Classification Development

Gynaecology procedures

1268 Abdominal hysterectomy

Note: *Subtotal (~~laparoscopic~~)-abdominal hysterectomy* – involves removal of the uterus leaving the cervix attached to the vagina

Total (~~laparoscopic~~)-abdominal hysterectomy – involves removal of the uterus, including the cervix

Radical ~~abdominal~~ hysterectomy – involves removal of the uterus including the cervix, upper 1–2 centimetres of vagina and ~~parametrial~~ tissue

Code also when performed:

- debulking of uterus (35658-00 [1270])
- [radical excision of pelvic lymph nodes \(96245-05 \[806\]\)](#)
- [removal of adnexa \(fallopian tube, ovarian cyst, ovary \(bilateral\) \(unilateral\)\) – see Alphabetic Index](#)

1269 Vaginal hysterectomy

Code also when performed:

- debulking of uterus (35658-00 [1270])
- [radical excision of pelvic lymph nodes \(96245-05 \[806\]\)](#)
- [removal of adnexa \(fallopian tube, ovarian cyst, ovary \(bilateral\) \(unilateral\)\) – see Alphabetic Index](#)

 Australian Consortium for Classification Development

Gynaecology procedures

[1268] Abdominal hysterectomy

- 35653-05 *Laparoscopic subtotal abdominal hysterectomy*
- 35653-07 *Laparoscopic total abdominal hysterectomy*
- 35667-02 *Laparoscopic radical abdominal hysterectomy*

[1269] Vaginal hysterectomy

- 35667-03 *Laparoscopically assisted radical vaginal hysterectomy*

 Australian Consortium for Classification Development

Gynaecology procedures

Example 1:

Diagnosis: Cancer of the uterus (serous cystadenocarcinoma)

Operation Report: Pelvic adhesiolysis, en bloc hysterectomy, bilateral salpingo-oophorectomy, GA

Pathology: Serous cystadenocarcinoma

 Australian Consortium for Classification Development

Gynaecology procedures

Assign:

C55	<i>Malignant neoplasm of uterus, part unspecified</i>
M8441/3	<i>Serous cystadenocarcinoma NOS</i>
N73.6	<i>Female pelvic peritoneal adhesions</i>
35653-01 [1268]	<i>Total abdominal hysterectomy</i>
35717-04 [1252]	<i>Salpingo-oophorectomy, bilateral</i>
30378-00 [986]	<i>Division of abdominal adhesions</i>
92514-99 [1910]	<i>General anaesthesia, ASA 99</i>

 Australian Consortium for Classification Development

Gynaecology procedures

New code at block **[1294]** Repair procedures on vulva or perineum:

- 35533-01 **[1294]** *Repair of perineum*

New codes at block **[1299]** Other procedures on female genital organs:

- 96251-00 **[1299]** *Implantation of brachytherapy applicator, female genital organ*
- 96251-01 **[1299]** *Removal of brachytherapy applicator, female genital organ*
- 35759-01 **[1299]** *Control of post abortion haemorrhage, not elsewhere classified*

Australian Consortium for Classification Development

Mental health disorders in pregnancy

O99.3 *Mental disorders and diseases of the nervous system in pregnancy, childbirth and the puerperium* was unbundled to differentiate mental health disorders and disorders of the nervous system, by the introduction of two codes:

- O99.31 *Mental disorders in pregnancy, childbirth and the puerperium*
- O99.32 *Diseases of the nervous system in pregnancy, childbirth and the puerperium*

Australian Consortium for Classification Development

Abortion

Integration of the guidelines in ACS 1511 *Termination of pregnancy (abortion)*.

Assign:

- A code from category O04 *Medical abortion* as principal diagnosis, or first code in the sequence
- A code for duration of pregnancy from category O09 *Duration of pregnancy*
- A code to indicate the reason for the medical abortion, if known. Where the reason is not documented in the medical record, clinical coders should seek clinical clarification, if possible.

Australian Consortium for Classification Development

Abortion

Assign:

- A code from O80 – O84 *Delivery* only if the medical abortion is performed after fetal viability
- O60.3 *Preterm delivery without spontaneous labour* only if the medical abortion is performed after fetal viability
- A code for outcome of delivery if the medical abortion is performed after fetal viability (regardless of outcome), or before fetal viability if the outcome is a liveborn infant

Australian Consortium for Classification Development

Abortion

Removal of excludes note '*complicating abortion or ectopic or molar pregnancy*' across multiple chapters in the Tabular List for example:-

I50

Heart failure

Use additional code (Z99.4) if mention of artificial heart dependence.

Excludes: *complicating abortion or ectopic or molar pregnancy (O00-O07, O08.8)*
due to hypertension:
• NOS (I11.0)
• with renal disease (I13.-)
neonatal cardiac failure (P29.0)

Instructional notes such as Use additional code and Code also notes were added to codes O03-O06 (at the fourth character subdivision) to clarify that codes from other chapters may be assigned to add specificity

Australian Consortium for Classification Development

Abortion

New code Z32.2 *Initiation of medical abortion* assigned when medical abortion is performed as a two staged intervention.

Assign:

- Stage 1: Z32.2 *Initiation of medical abortion* (if performed as an inpatient)
- Stage 2: O04.- *Medical abortion* (with 4th character)

[Z32.2](#) [Initiation of medical abortion](#)
[1511](#)

Admission for supervision of the initial episode of care for a staged medical abortion

Use additional code from category O09.- to identify duration of pregnancy.

Excludes: *that with:*

- [completion of abortion \(procedure\) \(O04.5-O04.9\)](#)
- [expulsion of products of conception \(O04.5-O04.9\)](#)

Australian Consortium for Classification Development

Abortion

90462-01 [1330] *Termination of pregnancy [abortion procedure], not elsewhere classified* was created to classify termination of pregnancy/abortion techniques not classified to:

- 90461-00 [1330] *Intra-amniotic injection*
- induction of labour in block [1334] or,
- using a surgical technique classified to [1265] *Curettage and evacuation of uterus*.

[90462-01 Termination of pregnancy \[abortion procedure\], not elsewhere classified](#)
▽ 1511

[Administration of pharmacological agent to induce abortion](#)

[Includes: administration \(oral\) \(suppository\) of:](#)

- [misoprostol](#)
- [prostaglandin](#)

[Excludes: intra-amniotic injection \(90461-00 \[1330\]\)
that with induction of labour \(90465 \[1334\]\)](#)

Australian Consortium for Classification Development

Abortion

Amendments at category O08 *Complications following abortion and ectopic and molar pregnancy* include amendment of the *Excludes* note and a *Note* was added.

O08 Complications following abortion and ectopic and molar pregnancy

▽ 1544

[Note:](#) [Codes from category O08 are assigned for complication\(s\) of:](#)

- [abortion, where the abortion was treated, performed or occurred prior to the episode of care](#)
- [ectopic and molar pregnancy](#)

[Excludes:](#) [complication\(s\) during episode of care:](#)

- [for staged abortion \(O04.5–O04.9\)](#)
 - [in which an abortion is treated, performed or occurred \(current episode\) \(O03–O06\)](#)
- [retained products of conception \(O03–O06\)](#)

Australian Consortium for Classification Development

Abortion

Example 2:

A 20 year old female was admitted at 13 weeks gestation for oral administration of misoprostol for termination of the pregnancy. The patient was discharged later in the day following completion of the abortion, without adverse effect.

Assign:

O04.9 *Medical abortion, complete or unspecified, without complication*
O09.1 *Duration of pregnancy 5-13 completed weeks*
90462-01 [1330] *Termination of pregnancy [abortion procedure] NEC*

Abortion

ACS 1544 *Complications following pregnancy with abortive outcome* has been revised to clarify:

- ✓ Complication/s with abortion
- ✓ Complication/s following abortion
- ✓ Complications from ectopic or molar pregnancy
- ✓ Admission for retained products of conception following abortion

Abortion

Glossary descriptions have been added to O31.1 *Continuing pregnancy after abortion of one fetus or more* and O31.2 *Continuing pregnancy after intrauterine death of one fetus or more* to clarify when these codes are assigned.

- O31.1 Continuing pregnancy after abortion of one fetus or more
[Continuing pregnancy after](#)
• fetal death in utero before fetal viability (less than 20 completed weeks (140 days) gestation and/or fetal weight less than 400g), of one fetus or more
• medical abortion of one fetus or more
• missed abortion of one fetus or more
• spontaneous abortion of one fetus or more
- O31.2 Continuing pregnancy after intrauterine death of one fetus or more
[Continuing pregnancy after fetal death in utero after fetal viability \(greater than or equal to 20 completed weeks \(140 days\) gestation and/or fetal weight greater than or equal to 400g\), of one fetus or more](#)

Australian Consortium for Classification Development

Pregnancy

The title of ACS 1437 *Infertility and in vitro fertilization (IVF)* was revised to include the concept of IVF.

When admission for investigation of fertility occurs assign:

- A code from category N97 *Female infertility* (for female)
- N46 *Male infertility* (for male)

Australian Consortium for Classification Development

Labour

Changes to ACS 1505 *Delivery and assisted delivery codes*:

- The table containing the ICD-10-AM codes from block O80 to O84 and ACHI delivery codes from blocks 1336 to 1343 has been revised.
- The Note following the table has been revised to clarify:
 - ✓ Delivery is not complete until after expulsion of the placenta
 - ✓ Assign additional ACHI codes for interventions performed during or following labour and delivery
 - ✓ Once an assistance procedure is performed the delivery is not classified as spontaneous but spontaneous delivery may include minor interventions
 - ✓ When ACHI codes for failed delivery procedures are assigned (eg failed forceps/vacuum extraction/version), assign ICD-10-AM codes for an assisted delivery

Delivery

The guidelines regarding multiple delivery in ACS 1505 *Delivery and assisted delivery codes* were amended to clarify that if babies are delivered by:

- the same method, assign the relevant ACHI code once only
- different methods, assign ACHI codes for each of the delivery methods.

Labour

Changes to ACS 1550 *Discharge/transfer in labour*:

- Classification guidelines for Transfer in (first stage) labour for administrative reasons were updated.

Where a patient in (first stage) labour is discharged home, or transferred to another facility for administrative reasons, assign as principal diagnosis either:

- O60.0 *Preterm labour without delivery* or,
- O47.2 *Labour without delivery*
- Synonyms for 'false labour' were added. Where a patient is discharged home with a documented diagnosis of false labour, assign a code from category O47 *False labour or labour without delivery* with fourth character .0, .1 or .9

Australian Consortium for Classification Development

Labour

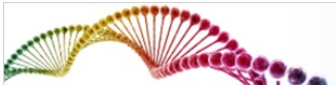

- Guidelines regarding Transfer in third stage of labour were added. Note that this is a rare/unusual scenario that is not classified as per the usual definition of complete delivery as per ACS 1505 *Delivery and assisted delivery codes*.

Where a patient in third stage of labour is transferred to another facility:

- At facility 1 code the delivery as per ACS 1505 *Delivery and assisted delivery*
- At facility 2 assign a code for the condition that was responsible for the transfer or assign O63.3 *Prolonged third stage of labour* if there is no documented indication for the transfer.

Australian Consortium for Classification Development

Labour

New codes

O61 Failed induction of labour

O61.0 Failed medical induction of labour
 Failed induction (of labour) by:
 • oxytocin
 • prostaglandins

Excludes: with failed surgical (instrumental) induction of labour (O61.2)

O61.1 Failed ~~instrumental-surgical~~ induction of labour
 Failed ~~induction (of labour)~~:
 • ~~instrumental~~ induction of labour
 • ~~mechanical~~ induction of labour
 • ~~surgical~~

Excludes: with failed medical induction of labour (O61.2)

⊗O61.2 Failed medical with surgical induction of labour
Failed induction of labour, following use of both medical and surgical (instrumental) methods

 Australian Consortium for Classification Development

Labour

New codes (*continued*)

O63 Long labour

O63.0 Prolonged first stage (of labour)

O63.1 Prolonged second stage (of labour)

O63.2 Delayed delivery of second ~~twin, triplet, etc~~ or subsequent fetus in multiple delivery
Delayed delivery of second twin, triplet etcetera

⊗O63.3 Prolonged third stage (of labour)
▽ 1550

O63.9 Long labour, unspecified
 Prolonged labour NOS]

 Australian Consortium for Classification Development

Delivery

- Codes in category O70 *Perineal laceration during delivery* have been revised with a note added:

Note: [Codes in category O70 represent a continuum. Where multiple perineal lacerations \(ruptures or tears\) of different degrees are documented, assign a code for the highest \(most severe\) degree only.](#)

- Codes at category O72 *Third stage and postpartum haemorrhage* have been revised:
 - ✓ The category title has been revised
 - ✓ Codes in this block are differentiated by the onset of haemorrhage
 - ✓ Conditions related to postpartum haemorrhage have been unbundled to allow assignment of postpartum haemorrhage as well as the underlying cause.

 Australian Consortium for Classification Development

Delivery

- Codes in category O73 *Retained placenta and membranes* have been revised:

O73	Retained placenta and membranes, without haemorrhage
O73.0	Retained placenta without haemorrhage Adherent placenta NOS <i>Code also morbidly adherent placenta (O43.2) third-stage haemorrhage (O72.0), if applicable.</i> <i>Excludes: morbidly adherent placenta (O43.2)</i>
O73.1	Retained portions of placenta and membranes, without haemorrhage Retained products of conception following delivery, without haemorrhage <i>Code also postpartum haemorrhage (O72.1, O72.2), if applicable</i>

 Australian Consortium for Classification Development

Delivery

Example 3:

A 33 year old female had a spontaneous vertex delivery complicated by haemorrhage immediately following delivery of the placenta. The patient was taken to theatre and 5 units of oxytocin was administered by slow release intravenous injection.

Operation report states “atonic uterus – small amounts of placental tissue removed by D&C under GA”. The patient also received a transfusion of blood (coagulation factors).

Delivery

Assign:

O80	<i>Single spontaneous delivery</i>
O72.1	<i>Other immediate postpartum haemorrhage</i>
O62.2	<i>Atonic uterus</i>
O73.1	<i>Retained portions of placenta or membranes</i>
Z37.0	<i>Single live birth</i>
90467-00 [1336]	<i>Spontaneous vertex delivery</i>
16564-00 [1345]	<i>Postpartum evacuation of uterus by dilation and curettage</i>
92061-00 [1893]	<i>Administration of coagulation factors</i>
92514-99 [1910]	<i>General anaesthesia ASA 99</i>

Delivery

Changes to block **[1336]** *Spontaneous delivery*:

- “Vertex” has been removed from block title
- A Note was added:

Note: Codes for spontaneous delivery are assigned when there is minimal or no assistance provided for the delivery.

Excludes: with delivery (assistance) procedure — see *Alphabetic Index: Delivery/by type*

- New code 90467-01 **[1336]** *Spontaneous delivery of placenta, not elsewhere classified*. Assign this code for patients who deliver prior to the episode of care, but spontaneously deliver the placenta during the episode of care.
- 90470-05 **[1336]** *Spontaneous breech delivery* (relocated from block **[1339]** *Breech delivery and extraction*). This includes spontaneous delivery of placenta.

 Australian Consortium for Classification Development

Delivery

Changes to block **[1343]** *Other procedures associated with delivery*:

- New code 90477-01 **[1343]** *Assisted vertex delivery*. This code is assigned with O83 *Other assisted single delivery* or O84.8 *Multiple delivery*

Reference to prophylactic vaccination added to ACS 1500 *Diagnosis sequencing in obstetric episodes of care*. E.g. If a patient is immunised with measles-mumps-rubella (MMR) vaccine in the delivery episode, assign:

- Z27.4 *Need for immunisation against measles-mumps-rubella [MMR]* and
- 92156-00 **[1882]** *Administration of measles-mumps-rubella vaccine*

 Australian Consortium for Classification Development

amended to remove reference to O82 (for code 90477-01)

Delivery

Example 4 :
 A 28 year old female is admitted for spontaneous onset of labour at 39 weeks. Vacuum delivery was attempted but failed, followed by a vaginal delivery of a healthy infant.

Assign:
O83 Other assisted single delivery
O66.5 Failed application of vacuum extractor and forceps, unspecified
Z37.0 Single live birth
 90477-01 **[1343]** *Assisted vertex delivery*
 90469-01 **[1343]** *Failed vacuum assisted delivery*

 Australian Consortium for Classification Development

Delivery

Example 5:
 Term delivery following induced labour at 39 weeks gestation. Twin 1 was delivered via spontaneous vertex delivery and twin 2 was delivered by lower segment caesarean section (LSCS) (with spinal anaesthesia, ASA 1 E).

Assign:
O84.82 Multiple delivery by combination of methods
 O30.0 *Twin pregnancy*
 Z37.2 *Twins, both liveborn*
 16520-03 **[1340]** *Emergency lower segment caesarean section*
 92508-10 **[1909]** *Neuraxial block, ASA 10*
 90467-00 **[1336]** *Spontaneous vertex delivery*
 90465-02 **[1334]** *Other medical induction of labour*

 Australian Consortium for Classification Development

Sequencing amended in example 5

Delivery

Example 6:

A 43 year old female went into labour at 36 weeks gestation. Patient presented to emergency at hospital A with lower abdominal pain due to contractions and was admitted into the labour ward.

10 hours later fetal distress was noted and due to high risk of complications the patient was transferred to nearby hospital B where she proceeded to deliver a healthy baby by emergency lower segment caesarean section, under epidural block ASA 1.

Delivery

Assign:

Hospital A

O68.9 *Labour and delivery complicated by fetal stress, unspecified*

Hospital B

O82 *Single delivery by caesarean section*

Z37.0 *Single live birth*

16520-03 [1340] *Emergency lower segment caesarean section*

92508-19 [1909] *Neuraxial block, ASA 19*

Delivery

The following changes have been made to ACS 1550 *Discharge/transfer in labour* which include:

- Renaming the section 'Definition' to 'Definition of labour', and the addition of a section Definition of false labour
- Addition of sections for 'transfer in first stage of labour', 'transfer in third stage of labour', 'discharge in labour'
- Addition of classification guidelines for transfer to another facility in the third stage of labour
- Addition of examples

Puerperal / Postpartum

Changes to ACS 1548 *Puerperal/postpartum condition or complication* including a cross reference to ACS 1550 *Discharge/transfer in labour*. ACHI codes have been added to the examples.

[For guidelines regarding transfer in third stage of labour \(ie after delivery of baby at one facility but before delivery of placenta at another facility\), see ACS 1550 *Discharge/transfer in labour*.](#)

Note: ACHI codes are not included in examples

At Z39.1 *Care and examination of lactating mother*, the Excludes note has been updated:

- Z39.1 Care and examination of lactating mother
Breastfeeding (attachment) difficulty without disorder of lactation
Supervision of lactation
Excludes: [breast infections associated with lactation \(O91.-\)](#)
disorders of lactation (O92.-)
[noninfective disorders of breast associated with lactation \(O92.-\)](#)

Neonates

- ACS 1618 *Low birth weight and gestational age* has been retired and the content transferred to the Tabular List and

P07 Disorders related to short gestation and low birth weight, not elsewhere classified

Includes: the listed conditions, without further specification, as the cause of mortality, morbidity or additional care, in newborn

Excludes: low birth weight

- [due to slow fetal growth and fetal malnutrition \(P05.-\)](#)
- [in term infant \(P05.-\)](#)

P07.0 Extremely low birth weight

Note: [Category P07.0 identifies an infant's weight at the time of birth, not the weight at subsequent episodes of care](#)

[Code first the gestational age \(P07.2-, P07.3-\)](#)

- ⊕P07.01 Extremely low birth weight 499g or less
- ⊕P07.02 Extremely low birth weight 500–749
- ⊕P07.03 Extremely low birth weight 750–999g

 Australian Consortium for Classification Development

Neonates

In a preterm infant's birth episode, the principal diagnosis will generally be either:

- P07.2- *Extreme immaturity*

P07.2 Extreme immaturity

Note: [Category P07.2 identifies the infant's gestational age \(ie period of time spent in utero\), not the infant's age in adjusted weeks](#)

[Code also low birth weight \(P07.0-, P07.1-\), if known](#)

- P07.3- *Other and unspecified preterm infants*

P07.3 Other and unspecified preterm infants

Note: [Category P07.3 identifies the infant's gestational age \(ie period of time spent in utero\), not the infant's age in adjusted weeks](#)

[Code also low birth weight \(P07.0-, P07.1-\), if known](#)

 Australian Consortium for Classification Development
