VNS	Vagal nerve stimulator
VCU	Voiding cystourethrogram

## B. Version history

Document name	Version	Details
Tier 2 Outpatient Clinic Definitions	Version 1.0	Released on 1 September 2011
Tier 2 Outpatient Clinic Definitions	Version 1.0.2	Released on the 28 October 2011 – with updates to typographical errors, as well as updates/changes to 'Affected Body Part' MDCs. Used for reporting in 2010–11.
Tier 2 Outpatient Clinic Definitions	Version 1.2	Draft released on 21 March 2012. Final issued on 8 June 2012 to be used for reporting from 2012-13.
Tier 2 Non-Admitted Services Definitions Manual	Version 2.0	Released on 25 February 2013 to be used for reporting from 2013-14.
Tier 2 Non-Admitted Services Definitions Manual	Version 3.0	Released on 21 February 2014 to be used for reporting from 2014-15.
Tier 2 Non-Admitted Services Definitions Manual	Version 4.0	Released on 4 March 2015 to be used for reporting from 2015-16.
Tier 2 Non-Admitted Services Definitions Manual	Version 4.1	Released on 22 February 2016 to be used for reporting from 2016-17.
Tier 2 Non-Admitted Services Definitions Manual	Version 5.0	Released on 16 March 2018 to be used for reporting from 2018-19.

# C. Objectives of the classification

## C.1 Overview of the Tier 2 Non-Admitted Services Classification

The Tier 2 Non-Admitted Services Classification (Tier 2) was primarily developed to support the introduction of activity based funding (ABF) for non-admitted hospital services in the Australian public hospital system.

In order to have an accurate understanding of the services provided by public hospitals, it is necessary to first organise that activity into categories suitable for analysis, costing, and funding across all Australian jurisdictions.

A clinic based classification, such as Tier 2, is one way of organising data. It provides a standard framework under which clinics providing similar health services can be grouped together, with each resultant group being referred to as a class. Each individual class is defined in terms of a specified range of activities. A detailed list of the definitions for Tier 2 classes can be found in chapter G *Classification definitions*. Tier 2 assumes the type of clinic where the health service is provided is a proxy for the patient's clinical condition.

Tier 2 is intended to classify a non-admitted clinic to a single class. All non-admitted patient service events provided by that clinic are subsequently classified to that Tier 2 class.

It is common for a clinic to perform a range of health services wider than those designated as belonging to a particular class, and when this occurs the clinic should be classified based on its predominant activity.

Activities undertaken that belong to classes other than that to which the clinic is classified, are described as its 'secondary activities'. The secondary activities of a clinic play no part in assigning the clinic to a Tier 2 class, but may be useful in undertaking future classification maintenance work, such as analysis on the appropriateness of the classification structure.

In Tier 2, each clinic has to be classified uniquely to one class so that only those clinics that perform the same range of predominant health services are brought together to form a class.

Tier 2 is a hierarchical classification comprising two levels, namely Groups (the broadest level of the classification) and Classes (the most detailed level of the classification). Please refer to chapter D *Classification structure* for more information.

## C.2 Tier 2 Non-Admitted Services Classification

When Tier 2 is being used for the purpose of ABF, the non-admitted services definitions manual should be read in conjunction with the:

- Non-admitted patient care data set specifications
- Tier 2 Non-Admitted Services Compendium
- Tier 2 Non-Admitted Services National Index.

Using these documents together will assist with consistent allocation of non-admitted services to a Tier 2 class. Due to the interrelated nature of the Tier 2 system, the Compendium and Definitions Manual are updated concurrently, with changes being reflected in the index and data set specifications shortly after.

Tier 2 is built around the concept of non-admitted care clinics. For the purposes of ABF, the term 'non-admitted care clinics' can be used interchangeably with the term 'non-admitted patient service units'. A Service unit is a recognised clinical team of one or more healthcare providers within a hospital, multi-purpose service or community health service that provides non-admitted patient services and/or non-admitted patient support activities. Non-admitted care clinics may otherwise be referred to as:

- outpatient clinics
- ambulatory care clinics.

### **C.2.1 Non-admitted patient care data set specifications**

These documents contain the data items required to be reported on a biannual basis to the Independent Hospital Pricing Authority (IHPA) for non-admitted service events. These documents provide further information on:

- the scope of non-admitted activity that is required to be reported to IHPA
- a list of the data items which are required to be reported
- a list of values, instructions and collection guidelines for all of the data items.

There are two non-admitted patient care data set specifications reported for ABF purposes:

- Activity Based Funding: Non-Admitted Patient Care Aggregate NBEDS – used to collect the total service events per Tier 2 class for public hospital services and local health network services
- Activity Based Funding: Non-Admitted Patient NBEDS – used to collect information for each non-admitted patient service event at each clinic of a facility.

### **C.2.2 Tier 2 Non-Admitted Services Compendium**

This document provides guidance on the counting rules associated with the Tier 2 classification for ABF purposes. It provides business rules and examples to assist with consistent counting, classification, and reporting of non-admitted activity data at a national level.

### **C.2.3 Tier 2 Non-Admitted Services National Index**

This document provides a way of navigating the Tier 2 classification to ensure non-admitted care clinics are classified to an appropriate Tier 2 class, in a consistent manner.

### **C.2.4 Other reference documents**

Tier 2 makes use of the Australian Institute of Health & Welfare national standards for the broader health sector as found in Metadata Online Registry (METeOR), the national repository for health metadata. As METeOR is applicable to the broader national health sector, IHPA may place additional counting qualifications on the standards for ABF purposes.

# D. Classification structure

## D.1 Structure Overview

Tier 2 classes provide a consistent framework for grouping clinics that provide non-admitted patient service events. At the group level, the classification is based on the nature of the health service provided, whilst at the class level the classification distinguishes between groups based on the predominant specialisation of the clinic. This is consistent with the use of Major Diagnostic Categories (MDC) in the Australian Refined Diagnosis Related Groups (AR-DRG) classification, which organises Diagnosis Related Groups (DRGs) into 24 categories based on their clinical attributes.

## D.2 Groups

Groups are the broadest level of Tier 2 and are formed to reflect the predominant nature of the health service being provided, whether procedural, diagnostic or consultative (provided either by general physician, allied health, clinical nurse or other specialist). Healthcare provider is often a good indication as to the nature of the predominant health service the clinic provides, however these are based on typical traditional providers of the service and so should be used as a guide only. In particular, they may not be reflective of the provision of the health service in smaller settings that may make more use of general clinicians.

Group	Range of classes
10 series - Procedures	<b>10.01 – 10.20</b>
20 series - Medical consultation	<b>20.01 – 20.56</b>
30 series - Diagnostic services	<b>30.01 – 30.08</b>
40 series - Allied health and/or clinical nurse specialist intervention	<b>40.01 – 40.62</b>

### D.2.1 10 series – Procedures

The 10 series is used to capture clinics where health care professionals provide procedural based health services.

### D.2.2 20 series – Medical consultation

The 20 series is used to capture clinics where the nature of the medical consultation means it is typically provided by a medical or nurse practitioner. In medical clinics, it is assumed that there may also be input from allied health personnel and/or Clinical Nurse Specialists (CNS).

### D.2.3 30 series – Diagnostic services

The 30 series is used to capture clinics that provide diagnostic services as inputs to the healthcare services of other non-admitted clinics.

### D.2.4 40 series – Allied health and/or clinical nurse specialist intervention

The 40 series is used to capture clinics where there are allied health personnel / CNSs providing the majority of services in a clinic.

## D.3 Classes

Classes are the most detailed level of Tier 2 and are formed to reflect the predominant specialisation of the clinic. Specialisation may be formed around the clinician, patient condition, patient population group or type of care.

Class definitions include specific examples of inclusions and exclusions. Tier 2 is a general classification where clinics are classified to a class based on their usual services, usual provider, or specialisation. The inclusions lists are intended to be a guide on the usual activity of clinics that would be classified to the class. Exclusions lists are intended to indicate that if a clinic mostly provides a service that appears in the list, the clinic may be more appropriately classified elsewhere. The inclusion and exclusion lists are not intended to be exhaustive of all services performed by all clinics that appropriately sit within the class.

### D.3.1 Class definition template

Heading: Number and class title (contents page listing)

Identifying attributes	
Number	<i>Numerical identifier</i>
Name	<i>Class title</i>
Category	<i>Group</i>
Affected body part	<i>Indicates the AR-DRG / MDCs to which patients visiting the clinic would be classified.</i>
Usual provider	<p><i>This element is for guidance only and specifies the discipline that usually provides the services in the clinic. More than one provider may be listed in some clinics but this does not mean that all providers must be present. Interns and registrars rostered to a medical specialist may be included. This field is not relevant for the provider agnostic 10 series.</i></p> <p><i>In some smaller settings, the services in the operational clinic may be provided by a general clinician, e.g. general physician for endocrinologist in diabetes clinic.</i></p> <p><i>Provider names from the Australian and New Zealand Standard Classification of Occupations (ANZSCO – 2013 Version 1.2) have been used where applicable.</i></p>
Definition of service	<i>The description of the class. Describes the overarching services provided by the clinic.</i>

Guide for use	
Activity	<p><i>Inclusions:</i></p> <p><i>Specific examples of services provided by clinics in the class. Inclusions <u>are not</u> exhaustive and include references to consultations, management and/or treatment of specific conditions.</i></p> <p><i>Exclusions:</i></p> <p><i>Specific examples of services that should not be attributed to the class. Also includes cross references to services provided in other classes. Exclusions <u>are not</u> exhaustive.</i></p>
Conditions	<i>The condition is documented if it is specific to the clinic at the exclusion of all other conditions under the MDC.</i>
Constraints	<i>Overarching issues of Tier 2 exclusivity regarding class convention are also specified where applicable.</i>

Administrative attributes	
Source	<i>Original source documentation from which class created.</i>
Date created	<i>Date first created.</i>
Date last updated	<i>Date the content was last updated (excludes formatting).</i>
Update source	<i>The rationale for content update – source or project.</i>
Reference material	<i>Reference style - American Psychological Association (APA).</i>

# E. Classification rules

The classification rules are designed to assist in allocating non-admitted care clinics to the Tier 2 classification.

Tier 2 is intended to classify non-admitted care clinics whereby all services provided by that clinic are classified to the one class.

## E.1 General classification rules

Healthcare provider is an important concept for classifying non-admitted care clinics as it is generally a good indication as to the nature of the predominant health service the clinic provides. The Tier 2 groups have been developed based on the typical provider who may supply the majority of services for clinics within a class. These should be used as guidance only as this may not be appropriate in all situations; in particular smaller settings such as rural hospitals may make more use of a general clinician. Clinics where the usual provider is a healthcare professional support staff, such as a therapy aide, should be classified to the relevant allied health and / or CNS interventions class that reflects the discipline of the healthcare provider under whose guidance they are working.

It is recommended to use the 'top-down' method to classify clinics. Using the top-down method, clinics are first classified to a group based on the predominant nature of health service provided by the clinic and then to the class most appropriate for the clinic's specialisation (often reflective of the specialty and discipline of the usual provider). For example:

- a clinic that mostly provides diagnostic services would be classified to the 30 series
- a clinic that mostly performs procedural and intervention services would be classified to the 10 series
- a clinic that mostly provides consultation services could be classified to either the 20 or 40 series. Clinics where the usual provider is a medical specialist are more appropriately classified to the 20 series, whereas those clinics where the usual provider is a clinical nurse specialist or allied health professional are classified to the 40 series.

Where a clinic is a combination of two or more specialisations, the most appropriate class is determined from the specialisation(s) that makes up the majority of the clinic's activity. For example:

- in a respiratory cancer clinic, if 60% of the clinic's activity is performed by a medical respiratory specialist and 40% is performed by an oncologist, all non-admitted patient service events performed by the clinic should be counted under 20.19 Respiratory
- an obstetrics clinic where 90% of the clinic's activity is performed by a midwife should be classified to 40.28 Midwifery and maternity
- a respiratory consultation clinic where thoracic medicine physicians provide 30% of the clinic's activity, allied health professionals provide 30% and clinical nurse specialists provide 40% is appropriately classified to 40.40 Respiratory.

In some settings, there may be a combination of procedural and consultation services within the one clinic. Similar to determining the more appropriate class, the predominant nature of services provided by the clinic determines the Tier 2 group the clinic is classified to. That is, if the clinic

predominantly provides procedural and intervention type services it is more appropriately classified within the 10 series. Clinics where the majority of services are consultative are mapped to either the 20 or 40 series depending on their specialisation.

## **E.2 Group specific classification rules**

### **10 series – Procedures and interventions**

The 10 series deliberately omits the 'usual provider' field in class definitions. Clinics that provide procedural services should be classified within this series based on the usual procedure the clinic delivers, rather than who is the usual provider of the clinic's services.

### **20 and 40 series – Consultation clinics**

Clinics where the usual provider is a nurse practitioner should be classified to the relevant class within the 20 series - Medical consultation rather than to a class within the 40 series - Allied health and/or CNS intervention.

A nurse practitioner is a registered nurse, educated and authorised to function autonomously in an advanced and extended clinical role. The title of nurse practitioner is protected by state and territory legislation and only those authorised by their nursing and midwifery regulatory authority are able to call themselves nurse practitioners.

Where there is a mix of medical practitioners, allied health personnel and / or CNSs in the one clinic for a specific service, the clinic should be classified to the Tier 2 group most relevant to the usual provider of the clinic's services. Spontaneous or ad hoc consultations provided by a medical practitioner to an allied health / CNS clinic should not result in a reassignment to a class within the 20 series - Medical consultation.

## 10.06 Endoscopy – gastrointestinal

Identifying attributes	
<b>Number</b>	10.06
<b>Name</b>	Endoscopy – gastrointestinal
<b>Category</b>	Procedures
<b>Affected body part</b>	MDC 06 Diseases and disorders of the digestive system
<b>Definition of service</b>	Investigation and/or treatment using an endoscope, a medical device consisting of a long, thin, flexible (or rigid) tube which has a light and a video camera to look inside a body cavity or organ.

Guide for use	
<b>Activity</b>	<p><i>Inclusions:</i></p> <p>Procedures performed include:</p> <ul style="list-style-type: none"> <li>• oesophagoscopy</li> <li>• gastroscopy</li> <li>• colonoscopy</li> <li>• duodenoscopy</li> <li>• sigmoidoscopy</li> </ul> <p>For the treatment of the following conditions:</p> <ul style="list-style-type: none"> <li>• anorectal conditions</li> <li>• colorectal cancer</li> <li>• inflammatory bowel disease</li> <li>• other disorders of bowel function (e.g. constipation and incontinence)</li> <li>• Crohn's disease and ulcerative colitis</li> <li>• Diverticulitis</li> </ul> <p><i>Exclusions:</i></p> <ul style="list-style-type: none"> <li>• cystoscopy (10.07)</li> <li>• colposcopy (10.07)</li> <li>• hysteroscopy (10.07)</li> <li>• laryngoscopy (10.09)</li> <li>• bronchoscopy (10.09)</li> </ul>

## 10.10 Renal dialysis – hospital delivered

Identifying attributes	
<b>Number</b>	10.10
<b>Name</b>	Renal dialysis – hospital delivered
<b>Category</b>	Procedures
<b>Affected body part</b>	MDC 11 Diseases and disorders of the kidney and urinary tract
<b>Definition of service</b>	<p>The treatment and management of patients suffering renal failure using either haemodialysis or peritoneal dialysis in a non-admitted hospital setting.</p> <p><b>Haemodialysis:</b> the patient's blood is pumped through tubing to a haemodialysis machine that acts as an artificial kidney, filtering waste products from the blood before returning it to the patient.</p> <p><b>Peritoneal dialysis:</b> a form of dialysis provided to patients where access to the peritoneum is by means of a small tube, or catheter, which is inserted surgically into the abdomen. The patient is then able to undertake peritoneal dialysis at home as a treatment necessary for renal failure.</p>

Guide for use	
<b>Activity</b>	<p><i>Inclusions:</i></p> <p>Management of the following in a non-admitted hospital setting:</p> <ul style="list-style-type: none"> <li>• automated peritoneal dialysis (APD)</li> <li>• continuous ambulatory peritoneal dialysis (CAPD)</li> <li>• continuous cycling peritoneal dialysis (CCPD)</li> <li>• haemodialysis</li> <li>• nocturnal dialysis</li> <li>• renal dialysis education where dialysis is performed</li> </ul> <p><i>Exclusions:</i></p> <ul style="list-style-type: none"> <li>• haemodialysis performed by the patient in their home without the presence of a health care provider (10.15)</li> <li>• peritoneal dialysis performed by the patient in their home without the presence of a health care provider (10.16)</li> <li>• consultation or renal dialysis education where no dialysis is performed (20.35)</li> </ul>
<b>Conditions</b>	<p><i>Inclusions:</i></p> <ul style="list-style-type: none"> <li>• end stage kidney failure</li> </ul>

## 10.14 Pain management interventions

Identifying attributes	
<b>Number</b>	10.14
<b>Name</b>	Pain management interventions
<b>Category</b>	Procedures
<b>Affected body part</b>	Multiple MDCs
<b>Definition of service</b>	The provision of pain management interventions for clients with moderate to severe levels of persistent pain.

Guide for use	
<b>Activity</b>	<p><i>Inclusions:</i></p> <p>Interventions may include:</p> <ul style="list-style-type: none"> <li>• interventional anaesthetic techniques</li> <li>• spinal cord stimulation</li> <li>• joint injections: facet and sacroiliac</li> <li>• radiofrequency denervation</li> <li>• sympathectomy</li> <li>• selective nerve root blocks</li> <li>• epidural injections</li> <li>• cryotherapy</li> <li>• management of intrathecal drug administration systems</li> </ul> <p><i>Exclusions:</i></p> <ul style="list-style-type: none"> <li>• medical consultation for pain management (20.03)</li> </ul>
<b>Conditions</b>	
<b>Constraints</b>	Non-procedural pain management interventions may be provided as part of the service in certain allied health/clinical nurse specialist clinics.

## 10.19 Ventilation – home delivered

Identifying attributes	
<b>Number</b>	10.19
<b>Name</b>	Ventilation – home delivered
<b>Category</b>	Procedures
<b>Affected body part</b>	Multiple MDCs
<b>Definition of service</b>	Ventilation self-administered by the patient or the patient's carer. <b>Ventilatory support:</b> a process by which gases are moved into the lungs by a device that assists respiration by augmenting or replacing the patient's own respiratory effort.

Guide for use	
<b>Activity</b>	<p>Note: Only service events for ventilator dependent patients are classified as in scope public hospital services eligible for Commonwealth funding under the National Health Reform Agreement. Ventilator dependent patients are those who would otherwise require hospitalisation and include:</p> <ul style="list-style-type: none"> <li>patients who cannot maintain spontaneous ventilation for four or more consecutive hours</li> <li>patients who require non-invasive ventilation for a minimum of 18 hours per day</li> <li>patients who are geographically isolated where more than 16 hours ventilator support is required and where a replacement ventilator cannot be provided within four hours</li> <li>patients who require ventilation during mobility as prescribed in their care plan</li> <li>patients ventilated via tracheostomy for a minimum of eight hours per day</li> <li>patients with central hypoventilation syndrome</li> <li>patients who require long term overnight non-invasive ventilation every night for a chest wall deformity related or neuromuscular related chronic respiratory failure</li> </ul> <p><i>Inclusions:</i></p> <p>Ventilator dependent patients that meet the above criteria. Procedures performed for these patients may include:</p> <ul style="list-style-type: none"> <li>bi-level positive airway pressure (BiPAP)</li> <li>continuous positive airway pressure (CPAP)</li> <li>diaphragm pacing</li> <li>negative pressure ventilation (iron lung)</li> <li>ventilation via tracheostomy</li> </ul> <p><i>Exclusions:</i></p> <ul style="list-style-type: none"> <li>Consultation or education in medical respiratory clinic where no ventilation was undertaken (20.19)</li> <li>Consultation or education in allied health/clinical nurse specialist respiratory clinic where no ventilation was undertaken (40.40)</li> </ul>

## 10.20 Radiation therapy – simulation and planning

Identifying attributes	
<b>Number</b>	10.20
<b>Name</b>	Radiation therapy - simulation and planning
<b>Category</b>	Procedures
<b>Affected body part</b>	MDC 17 Neoplastic disorders (haematological and solid neoplasms)
<b>Definition of service</b>	Simulation and planning of radiotherapy treatment techniques. Radiotherapy involves using x-rays, radioactive substances and other forms of radiant energy to destroy tumour cells and correct other abnormalities.

Guide for use	
<b>Activity</b>	<p>Inclusions:</p> <ul style="list-style-type: none"> <li>Palliative, adjuvant, neo-adjuvant and definitive radiation therapy simulation, planning and dosimetry</li> </ul> <p>Exclusions:</p> <ul style="list-style-type: none"> <li>delivery of radiation therapy treatment (10.12)</li> <li>radiation therapy consultation (20.43)</li> </ul>
<b>Conditions</b>

## **F.2 20 series – Medical consultation**

## 20.01 Transplants

Identifying attributes	
<b>Number</b>	20.01
<b>Name</b>	Transplants
<b>Category</b>	Medical consultation
<b>Affected body part</b>	Multiple MDCs
<b>Usual provider</b>	Transplant surgeons, specialist physicians
<b>Definition of service</b>	Consultation, pre- and post-transplant evaluation, including a variety of medical tests that provide complete information on overall health prior to and following transplant surgery. The clinic provides non-admitted services associated with all types of transplants.

Guide for use	
<b>Activity</b>	<p><i>Inclusions:</i></p> <p>The clinic may include consultations on the following services:</p> <ul style="list-style-type: none"> <li>• tissue typing</li> <li>• dobutamine stress echocardiogram (ECG)</li> <li>• cardiac catheterisation</li> <li>• guaiac blood testing</li> <li>• carotid ultrasound</li> <li>• pulmonary function test</li> <li>• upper gastrointestinal or endoscopy</li> <li>• peripheral vascular resistance (PVR) testing</li> <li>• voiding cystourethrogram (VCU)</li> <li>• abdominal and renal ultrasound</li> <li>• additional tests for women (pap test and Mammogram)</li> <li>• stem cell transplant (education)</li> <li>• immunosuppressant monitoring</li> </ul>
<b>Conditions</b>	
<b>Constraints</b>	Follow-up management of transplant patients may be provided in specialty medical consultation clinics.

## 20.02 Anaesthetics

Identifying attributes	
<b>Number</b>	20.02
<b>Name</b>	Anaesthetics
<b>Category</b>	Medical consultation
<b>Affected body part</b>	Multiple MDCs
<b>Usual provider</b>	Anaesthetist
<b>Definition of service</b>	The review of patients scheduled to undergo or have undergone general anaesthesia, a state of drug-induced non-responsiveness characterized by absence of response to any stimulus, loss of protective airway reflexes, and depression of respiration and disturbance of circulatory reflexes.

Guide for use	
<b>Activity</b>	<p><i>Inclusions:</i></p> <ul style="list-style-type: none"> <li>pre- and post- work up for patients undergoing anaesthesia (investigations, tests, medical history)</li> <li>evaluation of anaesthetic risk</li> <li>obtaining consent</li> </ul> <p><i>Exclusions:</i></p> <ul style="list-style-type: none"> <li>allied health/clinical nurse specialist pre-admission and pre-anaesthesia clinics (40.07)</li> </ul>
<b>Conditions</b>	
<b>Constraints</b>

## 20.03 Pain management

Identifying attributes	
<b>Number</b>	20.03
<b>Name</b>	Pain management
<b>Category</b>	Medical consultation
<b>Affected body part</b>	Multiple MDCs
<b>Usual provider</b>	Anaesthetist, neurologist, palliative medicine specialist, psychiatrist, accredited pain medicine physician
<b>Definition of service</b>	The review of patients that suffer from chronic and persistent pain.

Guide for use	
<b>Activity</b>	<p><i>Inclusions:</i></p> <ul style="list-style-type: none"> <li>• pain management to assist patients to cope with chronic pain without developing excessive dependence on drugs</li> </ul> <p><i>Exclusions:</i></p> <ul style="list-style-type: none"> <li>• provision of pain management procedures in specialised clinic (10.14)</li> </ul>
<b>Conditions</b>	
<b>Constraints</b>	Some pain management services may also be provided in specialty medical consultation and/or allied health intervention clinics.

Administrative attributes

## 20.04 Developmental disabilities

Identifying attributes	
<b>Number</b>	20.04
<b>Name</b>	Developmental disabilities
<b>Category</b>	Medical consultation
<b>Affected body part</b>	Multiple MDCs
<b>Usual provider</b>	Specialist physician (in developmental disability medicine), psychiatrist
<b>Definition of service</b>	Specialist services for management of people suffering from various developmental disabilities.

Guide for use	
<b>Activity</b>	<p><i>Inclusions:</i></p> <p>Consultation/treatment for the following conditions:</p> <ul style="list-style-type: none"> <li>• spina bifida</li> <li>• cerebral palsy</li> <li>• paediatric intellectual or physical delayed development</li> </ul> <p><i>Exclusions:</i></p> <ul style="list-style-type: none"> <li>• consultation/treatment for genetic conditions (20.08)</li> </ul>
<b>Conditions</b>	
<b>Constraints</b>	For allied health/clinical nurse specialist interventions alone.

Administrative attributes

## 20.05 General medicine

Identifying attributes	
<b>Number</b>	20.05
<b>Name</b>	General medicine
<b>Category</b>	Medical consultation
<b>Affected body part</b>	Multiple MDCs
<b>Usual provider</b>	Specialist physician (General medicine)
<b>Definition of service</b>	Assessment, management, diagnosis and or research of general medical conditions, where patients are not required to attend a specialist medical consultation clinic or such clinics do not exist

Guide for use	
<b>Activity</b>	<p><i>Inclusions:</i></p> <ul style="list-style-type: none"> <li>occupational health</li> </ul> <p><i>Exclusions:</i></p> <ul style="list-style-type: none"> <li>geriatric medicine (20.09)</li> <li>paediatric medicine (20.11)</li> <li>allied health/clinical nurse specialist general medicine clinic (40.53)</li> </ul>
<b>Conditions</b>	
<b>Constraints</b>	This clinic will service general medical patient consultations where sub-specialty medical consultation clinics are not operational or specified in the Tier 2 classification.

Administrative attributes	
<b>Source</b>	Victorian Ambulatory Classification and Funding System (VACS) List NSW Tier 2 Clinic List

## 20.09 Geriatric medicine

Identifying attributes	
<b>Number</b>	20.09
<b>Name</b>	Geriatric medicine
<b>Category</b>	Medical consultation
<b>Affected body part</b>	Multiple MDCs
<b>Usual provider</b>	Geriatrician, gerontologist
<b>Definition of service</b>	Assessment and management and treatment of older people with complex health care needs, often with more than one condition. Generally targeted at those over 65 (45 for Indigenous patients).

Guide for use	
<b>Activity</b>	<p><i>Inclusions:</i></p> <p>Consultation on the following services:</p> <ul style="list-style-type: none"> <li>• specialist intervention</li> <li>• patient advice, assessment and referral</li> <li>• education and training</li> </ul> <p>Management of the following conditions:</p> <ul style="list-style-type: none"> <li>• general geriatric conditions</li> <li>• falls, mobility and balance problems</li> <li>• Parkinson's disease</li> <li>• continence issues</li> <li>• cognitive deficits including dementia and Alzheimer disease</li> </ul> <p><i>Exclusions:</i></p> <ul style="list-style-type: none"> <li>• management of neurological conditions in specialist medical consultation clinic (20.15)</li> <li>• services provided as part of geriatric evaluation and management (GEM) clinic (20.49)</li> <li>• psychogeriatric medical consultation (20.50)</li> <li>• assessment by Aged Care Assessment Team (ACAT) (40.02)</li> <li>• allied health/clinical nurse specialist rehabilitation clinic, including falls management (40.12)</li> </ul>
<b>Conditions</b>	
<b>Constraints</b>

## 20.20 Respiratory – cystic fibrosis

Identifying attributes	
<b>Number</b>	20.20
<b>Name</b>	Respiratory – cystic fibrosis
<b>Category</b>	Medical consultation
<b>Affected body part</b>	MDC 04 Diseases and disorders of the respiratory system
<b>Usual provider</b>	Thoracic medicine physician
<b>Definition of service</b>	Management of patients with the inherited disease cystic fibrosis which affects the glands that make mucus and sweat (known as the secretory glands). Cystic fibrosis causes the body to produce abnormally thick, sticky mucus. This abnormal mucus clogs the lungs and leads to lung infections.

Guide for use	
<b>Activity</b>	<p><i>Inclusions:</i></p> <p>Consultation on the following services:</p> <ul style="list-style-type: none"> <li>• new diagnosis education</li> <li>• ongoing patient management and support</li> <li>• family support groups and education of families</li> </ul> <p><i>Exclusions:</i></p> <ul style="list-style-type: none"> <li>• management of cystic fibrosis in general respiratory clinic (20.19)</li> <li>• management of respiratory conditions in allied health/clinical nurse specialist respiratory clinic (40.40)</li> </ul>

## 20.50 Psychogeriatric

Identifying attributes	
<b>Number</b>	20.50
<b>Name</b>	Psychogeriatric
<b>Category</b>	Medical – consultation clinics
<b>Affected body part</b>	MDC 19 Mental diseases and disorders
<b>Usual provider</b>	Specialist physician (psychogeriatrics)
<b>Definition of service</b>	Care in which the primary clinical purpose or treatment goal is improvement in the functional status, behaviour and/or quality of life for an older patient with significant psychiatric or behavioural disturbance, caused by mental illness, an age-related organic brain impairment or a physical condition.

Guide for use	
<b>Activity</b>	<p><i>Inclusions:</i></p> <ul style="list-style-type: none"> <li>services provided in a psychogeriatric program under the principal clinical management of a specialist physician (psychogeriatrics)</li> </ul> <p><i>Exclusions:</i></p> <ul style="list-style-type: none"> <li>provision of services by specialist mental health service organisation (40.34)</li> <li>management in psychiatric medical consultation clinic (20.45)</li> <li>management in geriatric evaluation and management clinic (20.49)</li> <li>geriatric evaluation and management (GEM) services provided by allied health/clinical nurse specialist (40.36)</li> <li>psychogeriatric services provided in allied health/clinical nurse specialist clinic (40.37)</li> </ul> <p>Management by allied health/clinical nurse specialist in:</p> <ul style="list-style-type: none"> <li>psychology clinic (40.29)</li> <li>neuropsychology clinic (40.14)</li> <li>sexual health clinic (40.10)</li> <li>social work clinic (40.11)</li> <li>alcohol and other drugs clinic (40.30)</li> <li>primary health care clinic (40.08)</li> <li>general counselling clinic (40.33)</li> </ul>

## 20.51 Sleep disorders

Identifying attributes	
<b>Number</b>	20.51
<b>Name</b>	Sleep disorders
<b>Category</b>	Medical – consultation clinics
<b>Affected body part</b>	Multiple MDCs
<b>Usual provider</b>	Sleep medicine physician, sleep technologist
<b>Definition of service</b>	Medical specialist and allied health services for initial assessment and overall management of broad range of primary and secondary sleep disorders.

Guide for use	
<b>Activity</b>	<p><i>Inclusions:</i></p> <p>Consultation on the following services:</p> <ul style="list-style-type: none"> <li>• investigation of symptoms</li> <li>• initiation of treatment including continuous positive airway pressure (CPAP) and other forms of non-invasive ventilation</li> <li>• oral appliances</li> <li>• behavioural therapy</li> <li>• pharmacotherapy</li> <li>• long term support of patients on medical devices</li> </ul> <p>Assessment and management of:</p> <ul style="list-style-type: none"> <li>• snoring</li> <li>• sleep apnoea</li> <li>• sleep hypoventilation</li> <li>• chronic or recurrent respiratory failure</li> <li>• narcolepsy and related conditions</li> </ul> <p><i>Exclusions:</i></p> <ul style="list-style-type: none"> <li>• sleep studies in measurement clinic (30.08)</li> <li>• management of sleep disorders in respiratory clinic (20.19)</li> <li>• management of sleep disorders in ENT clinic (20.18)</li> </ul>

## 20.53 Obstetrics – management of complex pregnancy

Identifying attributes	
<b>Number</b>	20.53
<b>Name</b>	Obstetrics – management of complex pregnancy
<b>Category</b>	Medical consultation
<b>Affected body part</b>	MDC 14 Pregnancy, childbirth and the puerperium
<b>Usual provider</b>	Obstetrician and gynaecologist
<b>Definition of service</b>	Assessment and management of women during complex pregnancies and post-birth.

Guide for use	
<b>Activity</b>	<p><i>Inclusions:</i></p> <p>Consultation on the following services:</p> <ul style="list-style-type: none"> <li>• counselling, either before or after a complex pregnancy and/or labour and birth</li> <li>• cardiotocography (CTG fetal monitoring)</li> <li>• provision of obstetric care to vulnerable or at risk groups, such as pregnant teenagers, Aboriginal &amp; Torres Strait Islander women, refugee &amp; migrant women, and women with family services involvement including domestic violence orders or child protection, women dependent on drugs or alcohol, incarcerated women</li> <li>• treatment of endocrine disorders in pregnant women including pre-existing diabetes, gestational diabetes mellitus and thyroid conditions</li> <li>• next birth after Caesarean Section services</li> <li>• treatment of antepartum haemorrhage</li> <li>• treatment of perinatal mental health disorders if delivered by staff other than mental health staff</li> <li>• management &amp; exclusion of Preterm Ruptured membranes</li> <li>• threatened Preterm Labour</li> <li>• management of Cholestasis</li> <li>• management of pre-eclampsia</li> <li>• treatment of abnormalities of the placenta</li> <li>• management of multiple gestation pregnancy</li> <li>• management of disorders of fetal growth, including fetal growth restriction</li> <li>• treatment of hypertensive disorders of pregnancy</li> <li>• management of risk of cervical incompetence</li> <li>• management of malpresentations including external cephalic version</li> </ul> <p><i>Exclusions:</i></p> <ul style="list-style-type: none"> <li>• management of uncomplicated pregnancy, labour and births by obstetrician (20.40)</li> <li>• management in maternal fetal medicine clinic (20.54)</li> <li>• management of pregnancy, labour and birth in allied health/clinical nurse specialist clinic (40.28)</li> </ul>

## 20.56 Multidisciplinary case conference (MDCC) – patient not present

Identifying attributes	
<b>Number</b>	20.56
<b>Name</b>	Multidisciplinary case conference (MDCC) – patient not present
<b>Category</b>	Medical consultation
<b>Affected body part</b>	Multiple MDCs
<b>Usual provider</b>	Medical officer or nurse practitioner
<b>Definition of service</b>	A multidisciplinary case conference (MDCC) where the patient is not present is a meeting or a discussion held concurrently between health care providers from different professions or specialisations, arranged in advance, to discuss a patient in detail, and to coordinate care. The meeting may involve discussion of an individual patient or multiple patients. A multidisciplinary case conference ensures that a patient's multidisciplinary care needs are met through a planned and coordinated approach.

Guide for use	
<b>Activity</b>	<ul style="list-style-type: none"> <li>• A non-admitted MDCC must involve three or more health care providers who have direct care responsibilities for the patient discussed:               <ul style="list-style-type: none"> <li>○ The health care providers may be of the same profession (medical, nursing, midwifery or allied health).</li> <li>○ Each participating health care provider must each have a different speciality so that the care provided by each provider is unique or</li> <li>○ The health care providers may be of different professions (medical, nursing, midwifery or allied health) but of the same specialty (e.g. oncologist, oncology registered nurse, physiotherapist).</li> </ul> </li> <li>• For each non-admitted patient discussed, a multidisciplinary management plan must be in place or developed at the MDCC, and one participating health care provider must record the following items in each patient's clinical record:               <ol style="list-style-type: none"> <li>i. the name of the MDCC event, the date of the event, and the start and end times (or duration) at which each patient was discussed during the case conference</li> <li>ii. the names of the participants involved in the discussion relating to the patient and their designations/clinical backgrounds</li> <li>iii. a description of the non-admitted patient's problems, goals and strategies relevant to that MDCC, and</li> <li>iv. a summary of the outcomes of the MDCC.</li> </ol> <p><i>Note: Items (iii) and (iv) may be completed through documentation (or revision) of a multidisciplinary care plan completed after each non-admitted MDCC where the patient is not present).</i></p> <p><i>Inclusions:</i></p> <ul style="list-style-type: none"> <li>• MDCCs where the majority of the health care providers participating in the MDCC are medical officers or nurse practitioners.</li> </ul> <p><i>Exclusions:</i></p> <ul style="list-style-type: none"> <li>• MDCCs where the majority of health care providers participating are allied health or nurse professionals (40.62).</li> </ul> </li> </ul>

### **F.3 30 series – Diagnostic services**

### 30.01 General imaging

Identifying attributes	
<b>Number</b>	30.01
<b>Name</b>	General imaging
<b>Category</b>	Diagnostic services
<b>Affected body part</b>	Multiple MDCs
<b>Usual provider</b>	Radiologist, medical diagnostic radiographer
<b>Definition of service</b>	Examination of any part of the body for diagnostic purposes by means of x-rays with the record of the findings usually impressed upon a photographic film.

Guide for use	
<b>Activity</b>	<p><i>Inclusions:</i></p> <p>The clinic may conduct the following services:</p> <ul style="list-style-type: none"> <li>• radiography</li> <li>• mammography</li> <li>• ultrasonography</li> <li>• scintigraphy</li> </ul> <p><i>Exclusions:</i></p> <ul style="list-style-type: none"> <li>• mammography screening (30.07)</li> </ul>

### 30.02 Magnetic resonance imaging (MRI)

Identifying attributes	
<b>Number</b>	30.02
<b>Name</b>	Magnetic resonance imaging (MRI)
<b>Category</b>	Diagnostic services
<b>Affected body part</b>	Multiple MDCs
<b>Usual provider</b>	Radiologist, medical diagnostic radiographer
<b>Definition of service</b>	The use of MRI to create cross-sectional images of the head and body, to diagnose a wide range of conditions.

Guide for use	
<b>Activity</b>	<p><i>Inclusions:</i></p> <p>Diagnosis of:</p> <ul style="list-style-type: none"> <li>• tumours</li> <li>• joint or spinal injuries or diseases,</li> <li>• soft tissue injuries or</li> <li>• diseases of internal organs (e.g. brain or heart)</li> </ul>

### 30.03 Computerised tomography (CT)

Identifying attributes	
<b>Number</b>	30.03
<b>Name</b>	Computerised tomography (CT)
<b>Category</b>	Diagnostic services
<b>Affected body part</b>	Multiple MDCs
<b>Usual provider</b>	Radiologist, medical diagnostic radiographer
<b>Definition of service</b>	The use of CT to diagnose patients. The CT scan creates a three dimensional picture of any part of the body using a computer.

Guide for use	
<b>Activity</b>	
<b>Conditions</b>

### 30.04 Nuclear medicine

Identifying attributes	
<b>Number</b>	30.04
<b>Name</b>	Nuclear medicine
<b>Category</b>	Diagnostic services
<b>Affected body part</b>	Multiple MDCs
<b>Usual provider</b>	Nuclear medicine specialist
<b>Definition of service</b>	The safe use of radioactive materials for diagnosis and treatment of various diseases.

### Guide for use

<b>Activity</b>	<p><i>Inclusions:</i></p> <p>Treatment of:</p> <ul style="list-style-type: none"> <li>• hyperthyroidism (thyroid uptake measurement)</li> <li>• thyroid cancer</li> <li>• blood imbalances</li> <li>• pain relief from certain types of bone cancers</li> <li>• bone scans for orthopaedic injuries</li> <li>• lung scans for blood clots (lung scintigraphy)</li> <li>• liver and gall bladder procedures to diagnose abnormal function or blockages (hepatic and splenic Imaging)</li> </ul>

**30.05 Pathology (microbiology, haematology, biochemistry)**

Identifying attributes	
<b>Number</b>	30.05
<b>Name</b>	Pathology (microbiology, haematology, biochemistry)
<b>Category</b>	Diagnostic services
<b>Affected body part</b>	Multiple MDCs
<b>Usual provider</b>	Pathologist
<b>Definition of service</b>	Pathology collection services and other investigations to determine the origin, nature and causes of diseases.

Guide for use	
<b>Activity</b>	<p><i>Inclusions:</i></p> <p>The clinic may conduct the following services:</p> <ul style="list-style-type: none"> <li>• collection of specimens</li> <li>• diagnostic testing and monitoring of chronic diseases</li> <li>• blood transfusion technologies</li> </ul> <p>The types of pathology include:</p> <ul style="list-style-type: none"> <li>• anatomical pathology</li> <li>• chemical pathology</li> <li>• clinical pathology</li> <li>• general pathology</li> <li>• genetic pathology</li> <li>• haematology</li> <li>• immunopathology</li> <li>• microbiology</li> </ul> <p><i>Exclusions:</i></p> <ul style="list-style-type: none"> <li>• genetic counselling (20.08)</li> </ul>

### 30.06 Positron emission tomography (PET)

Identifying attributes	
<b>Number</b>	30.06
<b>Name</b>	Positron emission tomography (PET)
<b>Category</b>	Diagnostic services
<b>Affected body part</b>	Multiple MDCs
<b>Usual provider</b>	Nuclear medicine specialist
<b>Definition of service</b>	The use of PET scanning allowing non-invasive diagnostic imaging of metabolic processes using short-lived radioisotopes. PET can quantify biochemical and physiological function.  Cardiac PET scans work to identify the cellular changes that occur in the body during disease.

Guide for use	
<b>Activity</b>	<i>Exclusions:</i> <ul style="list-style-type: none"> <li>• nuclear medicine (30.04)</li> <li>• computerised tomography (30.03)</li> </ul>
<b>Conditions</b>	
<b>Constraints</b>

### 30.07 Mammography screening

Identifying attributes	
<b>Number</b>	30.07
<b>Name</b>	Mammography screening
<b>Category</b>	Diagnostic services
<b>Affected body part</b>	MDC 09 Diseases and disorders of the skin, subcutaneous tissue and breast
<b>Usual provider</b>	Radiologist, medical diagnostic radiographer
<b>Definition of service</b>	The regular mammographic screening for breast cancer of all women over the age of 40 years. Mammography uses a low dose x-ray for examination of breast tissue to diagnose breast conditions.

Guide for use	
<b>Activity</b>	<i>Inclusions:</i> <ul style="list-style-type: none"> <li>digital mammography</li> <li>computer aided detection</li> </ul>
<b>Conditions</b>	<i>Inclusions:</i> <ul style="list-style-type: none"> <li>breast conditions</li> </ul>
<b>Constraints</b>

### 30.08 Clinical measurement

Identifying attributes	
<b>Number</b>	30.08
<b>Name</b>	Clinical measurement
<b>Category</b>	Diagnostic services
<b>Affected body part</b>	Multiple MDCs
<b>Usual provider</b>	Specialist physician, clinical measurement scientist
<b>Definition of service</b>	<p>The use of physiological monitoring tools and diagnostic procedures to assist in measuring, processing, storing and analysing physiological parameters of health and wellbeing of clients. Clinical measurement scientists work in multidisciplinary teams in the areas of:</p> <ul style="list-style-type: none"> <li>• cardiology</li> <li>• neurophysiology</li> <li>• vascular physiology</li> <li>• respiratory physiology</li> </ul>

Guide for use	
<b>Activity</b>	<p><i>Inclusions:</i></p> <p>Provision of the following services:</p> <ul style="list-style-type: none"> <li>• urodynamics assessment</li> <li>• oesophageal mobility and pH monitoring</li> <li>• respiratory measurements</li> <li>• sleep studies</li> <li>• stress studies - electrocardiogram (ECG), electroencephalogram (EEG), electromyogram (EMG)</li> <li>• pulmonary function test</li> <li>• spirometry</li> <li>• specialised cardiac tests (including holter monitor services)</li> <li>• neurophysiological</li> <li>• neuropsychological measures</li> <li>• clinical photography</li> </ul> <p><i>Exclusions:</i></p> <ul style="list-style-type: none"> <li>• management of sleep disorders in medical consultation clinic (20.51)</li> </ul>
<b>Conditions</b>	
<b>Constraints</b>	Some measurement and/or testing may be provided as part of medical consultation and allied health/clinical nurse specialist clinics.

## **F.4 40 series– Allied health and/or clinical nurse specialist interventions**

## 40.02 Aged care assessment

Identifying attributes	
<b>Number</b>	40.02
<b>Name</b>	Aged care assessment
<b>Category</b>	Allied health and/or clinical nurse specialist interventions
<b>Affected body part</b>	Multiple MDCs
<b>Usual provider</b>	Allied health/clinical nurse specialist
<b>Definition of service</b>	Assessment, management and treatment of older people. Generally targeted at those over 65 (45 for indigenous population).

Guide for use	
<b>Activity</b>	<p><i>Inclusions:</i></p> <p>Consultations and care for older people with complex health care needs, often with more than one condition including:</p> <ul style="list-style-type: none"> <li>• general geriatrics</li> <li>• geriatric assessment</li> <li>• memory evaluation</li> <li>• balance and mobility</li> <li>• Parkinson's disease</li> <li>• aged care assessment team (ACAT)</li> <li>• continence problems</li> </ul> <p><i>Exclusions:</i></p> <ul style="list-style-type: none"> <li>• geriatric services provided in geriatric medicine clinic (20.09)</li> <li>• services provided as part of geriatric evaluation and management (GEM) clinic (20.49)</li> <li>• psychogeriatric medical consultation (20.50)</li> <li>• services provided in allied health/clinical nurse specialist continence clinic (40.32)</li> </ul>

## 40.57 Cognition and memory

Identifying attributes	
<b>Number</b>	40.57
<b>Name</b>	Cognition and memory
<b>Category</b>	Allied health and/or clinical nurse specialist interventions
<b>Affected body part</b>	Multiple MDCs
<b>Usual provider</b>	Allied health/clinical nurse specialist
<b>Definition of service</b>	<p>Cognition and memory services provide early diagnosis, advice, therapeutic interventions, support and referral for people with cognitive difficulties causing confusion, memory loss or thinking problems. These services also provide support and advice to family and carers of those with cognitive difficulties.</p> <p>The service is usually provided by a multidisciplinary care team and aims to retain optimal functioning and activity</p>

Guide for use	
<b>Activity</b>	<p><i>Inclusions:</i></p> <p>The primary target group is people with dementia related illness with a particular focus on clients with newly emerging cognitive issues. Interventions may include:</p> <ul style="list-style-type: none"> <li>• comprehensive assessment of needs and impact of cognitive deficits</li> <li>• development of an integrated care plan</li> <li>• implementation of clinical interventions aimed at reducing the impact of the cognitive impairment</li> <li>• education of patient, family and carer</li> <li>• review of the care plan and effectiveness of interventions</li> <li>• follow-up and support</li> </ul> <p><i>Exclusions:</i></p> <p>Any memory or cognition service that is provided in:</p> <ul style="list-style-type: none"> <li>• allied health/clinical nurse specialist rehabilitation clinic (40.12)</li> <li>• medical consultation rehabilitation clinic (20.47)</li> <li>• allied health/clinical nurse specialist geriatric evaluation and management clinic (40.36)</li> <li>• medical consultation geriatric evaluation and management clinic (20.49)</li> <li>• allied health/clinical nurse specialist psychogeriatric clinic (40.37)</li> <li>• psychogeriatric medical consultation clinic (20.50)</li> <li>• geriatric medicine clinic (20.09)</li> <li>• psychiatry clinic (20.45)</li> <li>• allied health/clinical nurse specialist occupational therapy clinic (40.06)</li> <li>• allied health/clinical nurse specialist social work clinic (40.11)</li> <li>• allied health/clinical nurse specialist neuropsychology clinic (40.14)</li> <li>• allied health/clinical nurse specialist psychology clinic (40.29)</li> </ul>

## 40.58 Hospital avoidance programs

Identifying attributes	
<b>Number</b>	40.58
<b>Name</b>	Hospital avoidance programs
<b>Category</b>	Allied health and/or clinical nurse specialist interventions
<b>Affected body part</b>	Multiple MDCs
<b>Usual provider</b>	Allied health/clinical nurse specialist
<b>Definition of service</b>	<p>Comprehensive clinical assessment, risk screening and review of care generally targeted at people with chronic health and/or mental health conditions at risk of unplanned hospital presentations.</p> <p>Provision of time limited goal orientated care planning in an ambulatory setting to reduce unplanned admissions or readmissions to hospital and would usually include timely referral to specialist services and care coordination.</p>

Guide for use	
<b>Activity</b>	<p><i>Inclusions:</i></p> <p>Consultations for people with chronic and often complex health and /or mental health conditions who require comprehensive needs assessment, care planning and review to prevent unplanned hospital admissions.</p> <p>These activities can be home or centre based including:</p> <ul style="list-style-type: none"> <li>• comprehensive client needs assessment</li> <li>• development of multidisciplinary care plan with client</li> <li>• client self management training and support to apply recommendations of specialist assessments, advice and care planning to manage and monitor their condition</li> <li>• review and follow-up of the effectiveness of the ongoing care plan and strategies implemented.</li> </ul> <p><i>Exclusions:</i></p> <ul style="list-style-type: none"> <li>• management provided in allied health/clinical nurse specialist rehabilitation clinic (40.12)</li> <li>• management provided in medical consultation rehabilitation clinic (20.47)</li> <li>• management provided in allied health/clinical nurse specialist geriatric evaluation and management clinic (40.36)</li> <li>• management provided in medical consultation geriatric evaluation and management clinic (20.49)</li> <li>• management provided in allied health/clinical nurse specialist palliative care clinic (40.35)</li> <li>• management provided in medical palliative care clinic (20.13)</li> </ul>

## 40.59 Post-acute care

Identifying attributes	
<b>Number</b>	40.59
<b>Name</b>	Post-acute care
<b>Category</b>	Allied health and/or clinical nurse specialist interventions
<b>Affected body part</b>	Multiple MDCs
<b>Usual provider</b>	Allied health/clinical nurse specialist
<b>Definition of service</b>	Post-acute care services support early hospital discharge for people whose recuperation can be safely completed in their own homes, as an alternative to an extended hospital stay. Post-acute care services ensure that people who no longer need acute care are able to safely return home by providing short term care and assistance

Guide for use	
<b>Activity</b>	<p><i>Inclusions:</i></p> <p>People being discharged from a public hospital, including emergency departments, acute services and subacute services are eligible for post-acute care services if assessed as requiring short-term, community-based supports to assist them to recuperate in the community and to ensure a safe and timely discharge including:</p> <ul style="list-style-type: none"> <li>• comprehensive needs assessment</li> <li>• development of customised care packages which may include nursing; personal care, and/or single discipline allied health interventions.</li> <li>• care co-ordination, review and follow-up</li> <li>• other clinical care services provided during a patient's recuperative period, generally of a short-term nature (such as wound care and administration of antibiotics)</li> <li>• administration of antibiotics</li> <li>• management of anticoagulation therapy</li> <li>• wound care</li> <li>• clinical care services provided during a patient's recuperative period generally of a short-term nature</li> <li>• allied health, such as physiotherapy</li> </ul> <p>This includes services that are linked to admitted acute or emergency episodes.</p> <p><i>Exclusions:</i></p> <ul style="list-style-type: none"> <li>• Any post-acute care service that is provided in allied health/clinical nurse specialist: <ul style="list-style-type: none"> <li>○ physiotherapy clinic (40.09)</li> <li>○ occupational therapy clinic (40.06)</li> <li>○ wound management clinic (40.13)</li> </ul> </li> </ul>

## 40.61 Telehealth – patient location

Identifying attributes	
<b>Number</b>	40.61
<b>Name</b>	Telehealth – patient location
<b>Category</b>	Allied health and/or clinical nurse specialist interventions
<b>Affected body part</b>	Multiple MDCs
<b>Usual provider</b>	Allied health or nurse professional
<b>Definition of service</b>	The provision of services to patients attending a hospital for the purpose of receiving consultation from another hospital, delivered via information communication technology (ICT).

Guide for use	
<b>Activity</b>	<p>Note: For activity based funding, services delivered via ICT should be counted by the clinic providing the consultation service <b>and</b> by the public hospital service provider where the patient physically attends.</p> <p>The clinic providing the specialist consultation should be assigned to an appropriate Tier 2 class which reflects the clinic's specialisation.</p> <p>The clinic where the patient physically attends (the receiving location) should be classified to either 20.55 or 40.61 depending on the usual health care provider facilitating the service.</p> <p><i>Inclusions:</i></p> <ul style="list-style-type: none"> <li>consultations delivered via ICT where the patient is located at a public hospital service provider</li> </ul> <p><i>Exclusions:</i></p> <ul style="list-style-type: none"> <li>clinics providing consultation service via ICT</li> <li>patient location clinic provided by medical professional (20.55)</li> </ul>

## 40.62 Multidisciplinary case conference (MDCC) – patient not present

Identifying attributes	
<b>Number</b>	40.62
<b>Name</b>	Multidisciplinary case conference (MDCC) – patient not present
<b>Category</b>	Allied health and/or clinical nurse specialist interventions
<b>Affected body part</b>	Multiple MDCs
<b>Usual provider</b>	Allied health or nurse professional
<b>Definition of service</b>	A multidisciplinary case conference (MDCC) where the patient is not present is a meeting or a discussion held concurrently between health care providers from different professions or specialisations, arranged in advance, to discuss a patient in detail, and to coordinate care. The meeting may involve discussion of an individual patient or multiple patients. A multidisciplinary case conference ensures that a patient's multidisciplinary care needs are met through a planned and coordinated approach.

Guide for use	
<b>Activity</b>	<ul style="list-style-type: none"> <li>• A non-admitted MDCC must involve three or more health care providers who have direct care responsibilities for the patient discussed:               <ul style="list-style-type: none"> <li>○ The health care providers may be of the same profession (medical, nursing, midwifery or allied health).</li> <li>○ Each participating health care provider must each have a different speciality so that the care provided by each provider is unique or</li> <li>○ The health care providers may be of different professions (medical, nursing, midwifery or allied health) but of the same specialty (e.g. oncologist, oncology registered nurse, physiotherapist).</li> </ul> </li> <li>• For each non-admitted patient discussed, a multidisciplinary management plan must be in place or developed at the MDCC, and one participating health care provider must record the following items in each patient's clinical record:               <ol style="list-style-type: none"> <li>i. the name of the MDCC event, the date of the event, and the start and end times (or duration) at which each patient was discussed during the case conference</li> <li>ii. the names of the participants involved in the discussion relating to the patient and their designations/clinical backgrounds</li> <li>iii. a description of the non-admitted patient's problems, goals and strategies relevant to that MDCC, and</li> <li>iv. a summary of the outcomes of the MDCC.</li> </ol> <p><i>Note: Items (iii) and (iv) may be completed through documentation (or revision) of a multidisciplinary care plan completed after each non-admitted MDCC where the patient is not present).</i></p> <p><i>Inclusions:</i></p> <ul style="list-style-type: none"> <li>• MDCCs where the majority of the health care providers participating in the MDCC are allied health or nurse professionals.</li> </ul> <p><i>Exclusions:</i></p> <ul style="list-style-type: none"> <li>• MDCCs where the majority of health care providers participating are medical officers or nurse practitioners (20.56).</li> </ul> </li> </ul>
