Chapter 1 Overview

1.1 Independent Hospital Pricing Authority

The Independent Hospital Pricing Authority (*Pricing Authority*) is established under the *National Health Reform Act 2011 (Cth) (Act)*, and by virtue of section 131(1) of the Act is invested with the following functions relevant to this 2016-17 National Efficient Cost (NEC) Determination (*Determination*):

- (a) to determine the national efficient cost for health care services provided by public hospitals where the services are block funded;
- (b) to develop and specify classification systems for health care and other services provided by public hospitals;
- (c) except where otherwise agreed between the Commonwealth and a State – to determine the public hospital functions that are to be funded in the state by the Commonwealth.

In this document, ‘Pricing Authority’ refers to the governing members and ‘IHPA’ refers to the agency.

1.2 Data quality

In making this Determination, the Pricing Authority has relied on the National Public Hospital Establishments Database (NPHEd) and the National Hospital Cost Data Collection (NHCDC) to determine the key parameters of the model.

There have been significant improvements in the completeness and accuracy of data reported to the NPHEd over the past three years and further improvements are expected in future years.

The Pricing Authority remains satisfied that the data are adequate for the Pricing Authority to carry out its functions under the Act in 2016-17.

1.3 Terminology

Although the Pricing Authority aims to use plain English to make its documents accessible to a wide audience, the subject matter of this Determination requires the use of some specialist terms. For ease of reference, the meaning of those terms is set out in an [electronic glossary](#) available on the IHPA website.

Chapter 2 Block Funding Criteria

Clauses A27 and A28 of the National Health Reform Agreement (*NHRA*) detail the process that the Pricing Authority is required to follow to determine the criteria for block funded hospitals:

- a. IHPA, in consultation with jurisdictions, develops Block Funding Criteria and identifies whether hospital services and functions are eligible for block funding only or mixed Activity Based Funding (*ABF*) and block funding;
- b. States and territories, during the consultation period, assess their hospital functions and services against the Block Funding Criteria and, if necessary, provide advice to IHPA on the potential impact of the criteria;
- c. IHPA provides the Block Funding Criteria to the Council of Australian Governments (*COAG*) for endorsement; and
- d. COAG considers the Block Funding Criteria proposed by IHPA and either:
 - i. endorses the recommendation; or
 - ii. requests IHPA to refine the Block Funding Criteria and bring it back to COAG.

States and territories provide advice to IHPA on how their hospital services and functions meet the Block Funding Criteria on an annual basis. For small rural and small regional hospitals, this advice can be provided once every six years, or more frequently at the discretion of the state or territory.

The Pricing Authority provided the following draft Block Funding Criteria to COAG for consideration.

Public hospitals, or public hospital services, will be eligible for block grant funding if:

1. the technical requirements for applying ABF are not able to be satisfied.
2. there is an absence of economies of scale that mean some services would not be financially viable under ABF.

IHPA has also determined 'low volume' thresholds that form part of the draft Block Funding Criteria for use in 2016-17. Under these thresholds, hospitals are eligible for block funding if:

- they are in a metropolitan area (defined as 'major city' in the Australian Statistical Geography Standard (*ASGS*)) and they provide $\leq 1,800$ acute inpatient National Weighted Activity Units (*NWAU*) per annum; or
- they are in a rural area (defined as all remaining areas, including 'inner regional', 'outer regional', 'remote' and 'very remote' in the *ASGS*) and they provide $\leq 3,500$ total *NWAU* per annum.

Without pre-empting the decision of COAG, IHPA has applied these criteria in making this Determination.

States and territories have provided IHPA with hospitals they consider eligible for block funding in 2016-17.

IHPA has determined their eligibility by applying the three year average annual total *NWAU*, calculated using the IHPA data set specifications in successive IHPA Three Year Data Plans. These hospitals are listed at **Appendix A**.

Chapter 3 National Efficient Cost for Hospitals

3.1 National Efficient Cost

The NEC in 2016-17 is \$5.020 million. This represents the average cost of a block funded small rural hospital.

The NEC was determined using the average in-scope expenditure data for 2013-14 reported to the NPHED of \$4.324 million indexed at 5.1 per cent per annum to account for price and activity growth over the three years.

3.2 Calculation of the NEC for Small Rural Hospitals

The Pricing Authority recognises that block funded hospitals have significant fixed costs.

As detailed in **Table 1**, the Pricing Authority has determined eight different groupings for small rural block funded hospitals:

- 'Group 0' is for small rural block funded hospitals with in-scope expenditure which is below \$0.5 million. The group is determined on the basis of in-scope expenditure.
- 'Group A' to 'Group G' are determined on the basis of total reported NWAU activity.

Groups are further divided by hospital location on the basis of ASGS Region:

- 'Region 1' is for inner regional, outer regional and remote areas. These hospitals are sub-divided into three types which reflect the services they provide.
 - 'Type A' is for hospitals reporting more than 30 NWAUs of either surgical or obstetric episodes.
 - 'Type B' is for hospitals that do not fall into the above category, but have more than 40 per cent of their total NWAU reported as admitted activity.
 - 'Type C' is for the remaining 'Region 1' block funded small rural hospitals that do not meet the above two criteria.
- 'Region 2' is for small rural block funded hospitals in very remote areas.

The efficient cost of a hospital is determined by multiplying the cost weight of the relevant cell in **Table 1** by the NEC.

Table 1: Groupings for Small Rural Hospitals by service volume, ASGS region and type – 2016-17

Service Volume Grouping (Total NWAU)									
ASGS Region	Type	Group 0 <\$0.5 million	Group A 0 - 259.9 NWAU	Group B 260 - 459.9 NWAU	Group C 460 - 659.9 NWAU	Group D 660 - 1049.9 NWAU	Group E 1050 - 1699.9 NWAU	Group F 1700 - 2499.9 NWAU	Group G 2500 - 3500 NWAU
Region 1	Type A	N/A	N/A	N/A	0.858	1.163	1.615	2.210	3.494
	Type B	N/A	N/A	0.536	0.756	1.025	1.423	1.948	3.080
	Type C	0.028	0.352	0.467	0.659	0.894	1.241	1.699	N/A
Region 2		0.078	0.232	0.624	0.914	1.132	1.815	2.818	7.062

N/A = no hospitals are present in that combination of service volume, ASGS region and type.

3.3 Efficient Cost for Other Hospitals

Other block funded hospitals, treated separately from the cost model, are defined as:

- Standalone hospitals providing specialist mental health services (e.g. Psychiatric Hospitals); and
- Standalone major city hospitals providing specialist services (e.g. mothercraft, dental and dialysis).

In 2016-17, the Pricing Authority has determined the efficient cost of these hospitals will be determined in consultation with the relevant state or territory, with reference to their total in-scope reported expenditure in the NPHEd in 2013-14.

Chapter 4 Block Funded Services

In 2016-17, the Pricing Authority has determined that the following services in ABF hospitals are eligible for block funding as the technical requirements for applying ABF are not able to be satisfied:

- Teaching, Training and Research;
- Non-admitted Mental Health Services; and
- A17 List¹ services not otherwise priced.

The efficient cost of these services has been determined for 2016-17 on the advice of states and territories, and is detailed in **Table 2**.

Table 2: Block Funded Services

State / Territory	Teaching, Training and Research	Non-admitted Mental Health	A17 List
NSW	\$440,776,971	\$504,000,000	N/A
Vic	\$293,283,000	\$602,735,000	\$66,000
Qld	\$300,666,025	\$350,130,100	\$7,010,586
SA	\$101,009,877	\$112,432,146	\$6,095,624
WA	\$253,894,762	\$234,592,839	N/A
Tas	\$40,944,413	\$31,599,585	N/A
NT	\$22,568,835	\$19,854,327	N/A
ACT	\$22,373,999	\$37,376,963	N/A

¹ Under Clause A17 of the NHRA, IHPA has determined a list of services (the 'A17 List') which IHPA is satisfied were provided by a particular hospital in 2010. These services are eligible for Commonwealth funding at the Local Hospital Network indicated in the list at Appendix A of the *National Efficient Price Determination 2016-17*.

Chapter 5 Back-casting

The following back-cast figures are for use by the Administrator of the National Health Funding Pool as the base for calculating the growth in Commonwealth funding under the NHRA in 2016-17 from 2015-16.

These figures take account of changes in the methodology used to determine the NEC between years and to account for the addition and removal of block funded services as required by the NHRA.

The Pricing Authority has determined the back-cast NEC15 is \$4.826 million for the purpose of determining Commonwealth growth funding estimated between 2015-16 and 2016-17.

Table 3: Block funded back-casting multiplier by jurisdiction in 2016-17

State / Territory	Small Rural Hospital	Teaching, Training and Research	Non-admitted Mental Health	A17 List
