## How to use this document

The ICD-10-AM/ACHI/ACS classification system is used for classifying admitted patient care and comprises the following:

- International Statistical Classification of Diseases and Related Health Problems, Tenth Revision, Australian Modification (ICD-10-AM)
- Australian Classification of Health Interventions (ACHI)
- Australian Coding Standards (ACS).

For the published hardcopy books, ICD-10-AM/ACHI/ACS errata may be issued to correct errors and typographical issues that have been identified since the time of publishing. Users are required to incorporate these corrections when using the published hardcopy books.

This document lists corrections to be made to each of the hardcopy books listed in the following order:

- ICD-10-AM Tabular List
- ICD-10-AM Alphabetic Index
- ACHI Tabular List
- ACHI Alphabetic Index
- Australian Coding Standards

Each correction includes:

- The hardcopy book with a page reference
- Instructions to correct codes or terms (eg add, delete, amend)
- The corrected text without track changes detailed in a grey box
- The existing text with track changes detailed in a white box (eg [added text](#), ~~deleted text~~)

### Example of correction
